Murphy universal panels are compact and easy to install and are available in a variety of sizes and configurations for all types of applications. These panels are durable and corrosion resistant. Design and size of the panels give maximum flexibility in design and application to your instrument cluster.

SWICHGAGE® Instruments

Adding SWICHGAGE® instruments to your panel provides engine protection. A SWICHGAGE® is two instruments in one: (1) an accurate indicating gage with (2) a built-in, adjustable limit switch. The limit switch can operate Murphy ST Series SELECTRONIC® TATTLETALE® annunciators or be incorporated into existing engine shutdown or alarm systems. See Murphy

General Catalog for more information on SWICHGAGE® instruments and SELECTRONIC® TATTLETALE® annunciators.
